| Portfolio: <https://abhi20220.github.io/Advance-CSS-Portfolio/>

Currently undertaking a full-stack web development bootcamp where I will graduate on the 23rd of August. I am confident in my skills of using front-end technologies such as HTML and CSS. I am also adept at using Tailwind CSS and Bootstrap to create an intuitive user experience on the web. I am currently developing my skills in Object Oriented Programming and Javascript. I am known as an innovative problem solver with a focus on designing simplistic yet versatile web-designs. With each project my aim is to best engage my audience for an amazing experience. I worked within a team of five to develop a website that show cased information about any movie.

Technical Skills

Technical: HTML, CSS, GitHub, Bootstrap, Tailwind CSS, JavaScript, JQuery, APIs

UX/UI Design Tools: User Friendly, Color Theory, User Experience, Persona Creation, Interaction Design and Iconography, Typography

Projects

Major Project 1 | <https://gkal14.github.io/MoviDex/>

The aim of this project was to use the skills we have learnt to build a website where the user is able to search a movie and when clicked on, information about the movie is displayed, the trailer and links to its streaming counterparts.

- Skills | Technologies Used: HTML, Tailwind CSS, CSS, Javascript, JQuery, OMBD API, Streaming Availability API, User Friendly UI, User Experience Design (UI/UX)

Weather Dashboard | <https://abhi20220.github.io/Weather-Dashboard-API/>

The aim of this project was to create a weather dashboard using the Weather API to call back information and then display it to the user when a location is searched for

- Skills | Technologies Used: HTML, Javascript, CSS, API, User Friend UI.

Password Generator | <https://abhi20220.github.io/Password-Generator/>

The aim of this project was to construct a password generator that creates a password from lowercase, uppercase, numbers and special characters with a range of 8 to 128 characters

- Skills | Technologies Used: HTML, CSS, Javascript
